

Randi H Griffin

I am a Data Scientist with interests in the social sciences, digital marketing, and progressive analytics. In all of my endeavors, I aim to bring scientific integrity, creativity, a humble attitude, clear communication, and a commitment to mentorship and inclusivity.

rgriff23@gmail.com | <https://rgriff23.github.io> | <https://github.com/rgriff23> | www.linkedin.com/in/randigriffin

SKILLS

Programming: Python (pandas, scikit-learn, matplotlib); R (ggplot2, tidyverse, caret), SQL

Statistics: Generalized linear models, survival analysis, time series analysis, network analysis, meta-analysis

Machine learning: Classification, regression, clustering, forecasting, feature engineering, NLP

Other tools & techniques: git, bash, Airflow, R Shiny, dash, Google Data Studio

EDUCATION

Ph.D. in Human Evolutionary Biology, Duke University

May 2018

B.A. in Human Evolutionary Biology, Harvard University

May 2010

PROFESSIONAL DATA SCIENCE EXPERIENCE

KAYAK Software Corporation, *Data Scientist (Performance Marketing)* Cambridge, MA, Nov 2018 – Present

- Developed the company's first predictive model of keyword revenue-per-click to support our searchads algorithms, leveraging historical data and NLP techniques to provide smart estimates for long-tail keywords. I also designed a dash app with an interactive 3D TSNE plot to facilitate visual exploration of keyword predictions semantic space.
- Developed a rigorous counterfactual experimentation framework using Bayesian structural time series models for 1. Measuring lift in marketing experiments, 2. Identifying the best markets to use as treatment and control groups in future experiments, and 3. Estimating the statistical power of future experiments.
- Regularly contributed production Python and SQL code for ETLs and ad bidding algorithms.

Stand Up America, *Data Consultant (contract role)*

Remote, Oct 2020 – Nov 2020

- This temporary role focused on get-out-the-vote efforts on behalf of the Democratic Party in the 2020 presidential election. Responsibilities included voter data file pulls, data QA, and dashboarding using Periscope.

Insight Data Science, *Data Science Fellow*

Boston, MA, Sep 2018 – Nov 2018

- Built a dash app for a babysitting service that automatically geocodes user addresses, links them with census data, and uses logistic regression to estimate the probability that new users will subscribe to the babysitting app.

Duke University, *NSF Graduate Research Fellow*

Durham, NC, Sep 2013 – 2018

- Used multivariate GLMs to identify ecological predictors of primate skull morphology based on CT scans.
- Conducted simulation studies to evaluate statistical methods for estimating evolutionary ancestral states.
- Wrangled 10 years of data and used survival models to quantify parasite-mediated mortality in wild primates.
- Demonstrated fine-scale habitat segregation in mosquito communities using GLMMs and PCA, providing a recommendation of <20 meters for the minimum resolution of spatial data in mosquito-borne disease models.

Harvard University, *Research assistant*

Cambridge, MA, Sep 2011 – 2013

- Performed formal meta-analysis of 14 published studies and 164 effect sizes, with results contradicting the popular claim that elevated parasite loads in wild animals are driven by human-caused habitat disturbance.
- Simulated pathogen transmission on social networks and identified network characteristics (clustering, centrality) that increase susceptibility to epidemic and endemic pathogens.

OPEN SOURCE CONTRIBUTIONS

Parsons: This Movement Cooperative project provides ETL connectors to integrate NGP VAN with other data sources commonly used by progressive organizations. As of Oct 2020, I am the top volunteer contributor, having submitted 2 new connectors (Bloomerang and Periscope/Sisense), over 20 documentation PRs, and ~3000 lines of code: <https://github.com/move-coop/parsons/commits?author=rgriff23>

'btw' R package: I am the solo author of an R wrapper for BayesTraits, an executable C++ program for Bayesian phylogenetic models. <https://github.com/rgriff23/btw>

INDEPENDENT DATA SCIENCE PROJECTS

Web scraping Olympic history data: Scraped data on 135k Olympians from www.sports-reference.com and shared the dataset and my analysis on Kaggle. The dataset has been downloaded >56K times on Kaggle as of Oct, 2020.
<https://www.kaggle.com/heesoo37/olympic-history-data-a-thorough-analysis>

Twitterstorm analysis: Compiled data on 4.5k users and 5k tweets in a politically-charged Twitterstorm, then used social network and sentiment analysis to identify liberal and conservative clusters.
https://github.com/rgriff23/Katie_Hinde_Twitter_storm_text_analysis

StackOverflow developer survey analysis: Won a \$1000 Kaggle Kernel award for identifying relationships between age, gender, and sexual orientation that influence feelings of membership in the programming community.
<https://www.kaggle.com/heesoo37/stack-overflow-2018-survey-age-gender-sexuality>

TEACHING

Northeastern University, Lecturer (Masters in Analytics)

Boston, MA, Feb 2019 – Present

- Developed original materials and taught three quarters of Data Mining in R with excellent teacher ratings.

AnthroTree Workshop, Organizer and Lecturer

Multiple cities, 2012 – 2015

- Participated in every aspect of organizing an annual workshop on specialized statistical methods for PhD students, post-docs, and faculty in evolutionary biology
- Developed tutorial materials and lead a 3 hour workshop introducing the application of Generalized Linear Models to evolutionary datasets using R

ATHLETIC ACHIEVEMENT

South Korean 2018 Olympic Team and Women’s Ice Hockey National Team Player, 2015-2018.

<https://today.duke.edu/2018/03/duke-olympian-will-soon-defend-her-phd>

USA Hockey Certified Coach. Completed 4 years of training to attain the highest coaching certification provided by USA Hockey, and have coached youth teams ranging from the 12U to 19U age groups.
